Leesport, PA 19533

Dear Ed,

It has been a genuine pleasure to have worked with you and your Team on the liquidation of assets and the remediation of the Power Packaging, Inc. Hot Fill Bottling Plant in Reading, PA.

The project went very smoothly and without any conflict between the many parties involved in this effort. This, I believe, is largely because of the extensive investigation and planning done by BPDM prior to the commencement of any physical work in the facility, and the positive attitude exemplified by you and Ken Graver.

The final objective, of a building completely accepted by the Building Owner without additional work required, was completely met.

I will strongly recommend to any potential customer that BPDM be used for similar work, and when the need arises for Power Packaging, Inc., BPDM will definitely be used.

Kind regards,

**Dave Lovell**  
Sr. Director Engineering
